SALVATORE FERRAGAMO S.P.A (SFER:IM)

HOLD/NEUTRAL

Investment Summary & Recommendation

HOLD/NEUTRAL	7.02 €
Current Price	6.69 €

Stock Overview

Current Stock Price (Mar 2026): ~€6.69. Shares of Salvatore Ferragamo (SFER:IM) trade near the lower end of the YTD range having peaked at ~€8.71 in Jan 2026 before retreating. Market cap ~€1.11bn; EV ~€1.55bn. FY2025 PRELIMINARY revenues (Jan 27, 2026 press release): €977M (-5.7% at current FX, -3.8% at constant FX vs FY2024A €1,035M) — BETTER THAN FEARED; consensus had estimated €940–960M. Next event: FY2025 Full-Year Results — 10 March 2026. Beta (2Y weekly): 0.83. HOLD consensus; avg 12-mth target range €5.04–€6.82 depending on source (14 analysts). Morgan Stanley PT €5.50 Underweight; JPMorgan PT €4.60.

Recommendation

We maintain a HOLD/NEUTRAL rating with a CAUTIOUS UPGRADE WATCH. Current price ~€6.69 (Mar 2026) represents a 15.8% discount vs our Nov 2025 entry price of €7.94. FY2025 PRELIMINARY revenues €977M (announced Jan 27, 2026) came in ABOVE consensus (€940–960M), with Q4 2025 DTC turning positive (+6.3% cc) — the first channel recovery signal. H1 2025 EBIT -€44M (incl. €41M impairment); TTM EBITDA ~€160M (19.1% margin) implies H2 2025 EBITDA recovery to ~€87M. The economic spread (ROIC -5.2% vs WACC 6.62% = -11.8% spread) remains in negative territory but the trajectory is improving. Our blended intrinsic value €8.05 (50% FCFF, 25% P/E, 25% EV/EBITDA) implies +20.3% upside from ~€6.69. HOLD: The FY2025 revenue beat vs. consensus reduces tail risk materially. Monitor FY2025 full P&L results (10 Mar 2026) for EBITDA confirmation. Analyst consensus: avg target €5.04–€6.82 (14 analysts, . MS PT €5.50 UW; JPMorgan PT €4.60.

Intrinsic Value vs Market Price

Valuation & Relative

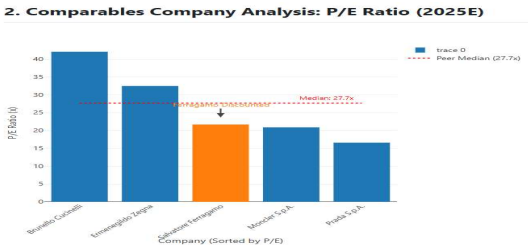
Key valuation metrics indicate the stock trades at a discount on earnings but this is justified by the current capital structure. The P/E multiple declines toward 17.8x on FY26 earnings, still below the sector average in the high teens/low twenties. FCF is currently negative due to turnaround investments.

Valuation & Market Metrics

	2024A	2025E*	2026E
P/E	N/A	N/A	N/A
PEG	—	—	—
EV/EBITDA	7.2x	9.7x	7.7x
Dividend Yield	0.0%	0.0%	1.0%

How Ferragamo does with Peers

Ferragamo trades at a P/E discount to its direct luxury peers (21.7x vs. peer average 27.7x), but in line with peers like Prada. The discount reflects the ongoing brand turnaround risk.While Ferragamo appears 'cheaper' than most peers on forward P/E, the FY2025 preliminary revenue beat (€977M vs €940–960M consensus) has improved the earnings trajectory. FY2025 is now the confirmed trough. TTM EV/EBITDA is ~9.7x based on TTM EBITDA ~€160M and EV ~€1.55bn — a significant improvement from the ~16x implied by H1-only annualisation. Q4 2025 DTC turning positive (+6.3% cc) reduces the bear case materially. Consensus avg target now €5.04–€6.82 (wide range) vs. current ~€6.69. The stock offers asymmetric upside if FY2025 full P&L results (Mar 10, 2026) confirm H2 EBITDA recovery above



Recent Earnings

FY2025 PRELIMINARY REVENUES (Ferragamo Press Release, Jan 27, 2026)

REVENUE: €977M FY2025 (-5.7% YoY at current FX; -3.8% at constant FX vs FY2024A €1,035M). BEAT: consensus was €940–960M. Q4 2025: €282M (-2.0% cc, -3.2% current FX). Q4 DTC: +6.3% constant FX — FIRST POSITIVE DTC QUARTER since the decline began. Full H2 implied:

Next: FY2025 Full-Year Results — 10 Mar 2026

Key Risk Factors

Financial Risk: Traditional net debt is minimal (net cash +€119M H1 2025), but economic obligations including IFRS 16 leases total ~€765M creating a heavy fixed-cost base. Economic Net Debt/EBITDA is elevated at ~7.6x 2025E given depressed EBITDA.

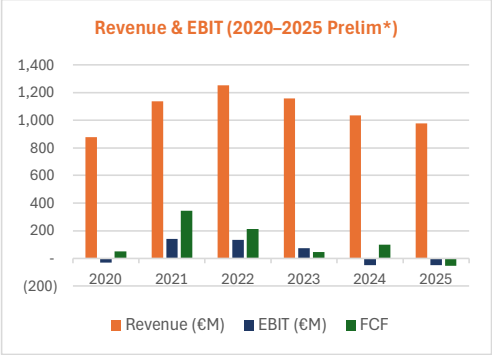
Execution Risk: H1 2025 confirmed execution risk is real — revenues -9.4% vs flat consensus. €41M impairment charge taken H1 2025. Brand reset will take multiple years.

China & Asia Pacific: Asia Pacific sales -18.5% in H1 2025 (-16.3% constant FX). Wholesale essentially in freefall. Recovery timing highly uncertain.

Analyst Downside: Morgan Stanley PT €5.50 Underweight; JPMorgan PT €4.60. Bear case implies -32% to -33% from €6.82.

FERRAGAMO S.P.A	HOLD/NEUTRAL
Historical Growth, M&A, Segment Drivers	Target Price 7.02
	Current Price 6.82

Historical Performance (2020-2024)					FY2025 Prelim*	
€m	2020	2021	2022	2023	2024	2025
Revenue	877	1,136	1,252	1,156	1,035	977
EBIT	(31)	141	133	72	(49)	(50)
EBIT Margin	-4%	12%	11%	6%	-5%	(0)
Financial Tre	(72)	81	107	26	(68)	-
FCF	**51**	**345**	**211**	**46**	**100**	**(55)**



Financial Trend: Revenue declined for three consecutive years: FY2023 €1,156M → FY2024 €1,035M (-10.5%) → FY2025 prelim €977M (-5.7%). Importantly, the rate of decline decelerated significantly from -10.5% to -5.7%, and Q4 2025 DTC turned positive (+6.3% cc). This is a key inflection signal for the turnaround. FY2025 is now

Despite the company reporting an operating loss (negative EBIT and Net Income) in 2024A, FCF increased to €99.6 million. This shows that the business still generates cash, with non-cash items like depreciation and inventory adjustments offsetting the reported losses.

M&A Activity

Salvatore Ferragamo's growth mainly relies on an organic turnaround led by new management, rather than large-scale M&A.

Brand / Ass	Category	Year	Type	Valuation	Rationale
New Creativ	Product/Image	FY23-FY25	Internal Shift	Undisclosed	brand elevation
DTC Acceleratio n	Distribution	Ongoing	Internal Shift	Undisclosed	Direct-to-Consumer
Greater China JVs	Distribution	Ongoing	Minority Stake Buyout	Undisclosed	Increased control operations

Revenue by Product Line (2020-2024)						
€m	2020	2021	2022	2023	2024	2025P*
Footwear	382	508	570	520	473	410
Leather Goo	352	450	507	473	423	410
Apparel	63	78	89	77	68	73
Other Produ	79	100	87	87	71	84

Ferragamo's product category that includesFootwear and Leather Goods remain the absolute core ofFerragamo, with the duo accounting for 86.6% of the total revenue in 2024A. Their combined percentage contribution has been slightly increased, which indicates a gradual strategic refocus towards these high-margin categories even
by the overall revenue decline. The overall strategic focus is on modernising these two core segments, particularly Footwear, which should be the main driver of the turnaround macro demand is stabilising. The high gross margin (around 71.5% in FY24) is a very good basis for profit recovery once the sales volume will be back.

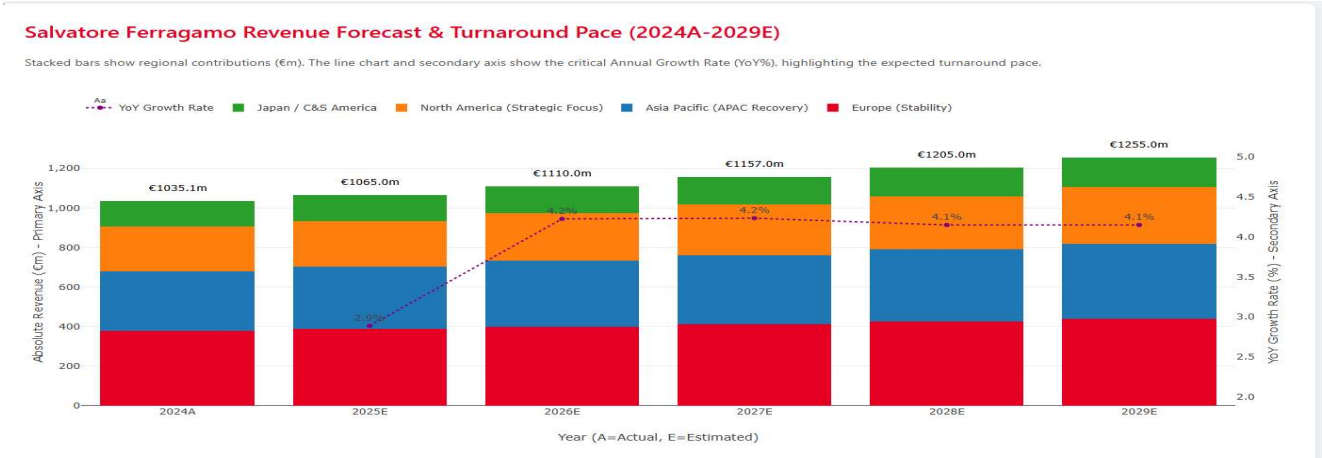
Revenue Forecast & Growth Assumptions (2024 - 2030)

IMPORTANT UPDATE (Mar 2026 — Post-Preliminary FY2025 Data): FY2025 PRELIMINARY revenues confirmed at €977M (Jan 27, 2026 press release), down 5.7% at current FX vs FY2024A €1,035M. This BEAT consensus of €940–960M by ~€17–37M and is better than our own revised ~€950M estimate. Q4 2025 DTC turned positive (+6.3% cc) — first recovery signal. H2 2025 revenues ~€503M vs H1 €474M, showing H2 stabilisation. The CAGR 2024A–2030E is revised to ~3.2% (from 2.9%) given the better-than-expected FY2025 base. FY2025 is now confirmed as the trough year. Recovery to pre-decline revenue levels (€1.1bn+) is now expected by FY2027E. Key risk: wholesale channel remains structurally challenged. Upside catalyst: DTC recovery continuation and Asia-Pacific stabilisation in FY2026. Source: Ferragamo Preliminary FY2025 Revenue, Jan 27, 2026 (group.ferragamo.com/investor-relations).



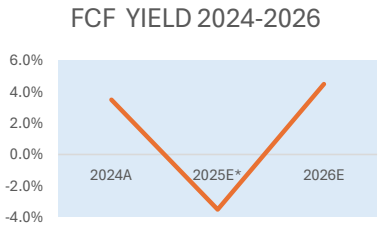
Income Statement Forecast (2024A–2030E) | *FY2025E

€m	FY2025E*	FY2026E	FY2027E	FY2028E	FY2029E	FY2030E
Revenue	977	1,046	1,083	1,132	1,184	1,233
COGS	278	298	309	322	337	351
Gross Profit	699	748	774	809	847	882
EBIT	(50)	(13)	(1)	11	23	24
Net Income	(75)	(31)	(21)	(11)	(1)	1

REVISED POST H1 2025: FY2025E revenue cut to ~€950M (H1 2025A = €474M, -9.4% YoY). Gross margin holds ~71.5%. EBIT ~-€80M (H1 EBIT -€44M incl. €41M impairment). Net loss FY2025E ~-€95M vs FSAP model -€39M. Recovery to EBIT breakeven pushed to FY2027E. Net income turns +ve only FY2030E. Source: Ferragamo H1 2025 Press Release Jul 31 2025.

Profitability Ratios (2024–2026)

	2024A	2025E*	2026E
ROA	-9.3%	0.5%	1.5%
ROE	-15.2%	-5.0%	-1.5%
ROIC	-5.2%	-1.3%	0.8%
ROIC>WACC	0.0%	-7.5%	-5.4%
Operating Margin	-4.7%	-5.1%	2.3%
FCF YIELD (FCF/EV)	3.5%	-3.5%	4.5%



The ratios are very volatile in the short-term but point to the change in the ratios between the restructuring loss (2024A) to the profitable growth (2026E), as quite a high improvement in the efficiency of the capital base.

FERRAGAMO S.P.A | **HOLD/NEUTRAL**

Valuation, Capital Structure & Return Analysis

Target Price	7.02 €
Current Price	6.69 €

Capital Structure, Debt Maturity

This is not large bond issues, but gross debt is mostly comprised of bank loans and revolving credit facilities (RCFs) being used to provide operational liquidity. Net cash position gives much financial flexibility to finance the ambitious Capex program EUR70m- EUR80m /year and possible strategic brand investments without financing.

Maturity Bucket	Carry Amount (€)	Avg Rate
Short-Term (≤ FY26)	15	4.5%
Medium-Term (FY27-29)	70	3.5%
Long-Term (FY30-34)	30	3.0%
Very Long-Term (FY35+)	0	0.0%
Total	**115**	**3.6%**

Maturity Bucket	Total Economic Obligations (€m)
Short-Term (≤ FY26)	195
Medium-Term (FY27-29)	320
Long-Term (FY30-34)	200
Very Long-Term (FY35+)	50
Total Economic Obligations	**765**

Ferragamo is exposed to the least refinancing risk as it has used traditional financial debt of just EUR115m and the cash resources can easily finance it. Nevertheless, there is a total of EUR765m of economic obligation (including IFRS 16 Lease Liabilities) that forms a huge base of fixed costs of the company and is anchored on its retail network.

Leverage, Coverage, & Credit Quality

Economic Net Debt / EBITDA peaked in 2025E at ~7.6x due to the H1 2025 EBITDA collapse (€73M; -38% YoY). However, FY2025 preliminary revenues of €977M (Jan 27, 2026) were better than feared, with H2 2025 implying an EBITDA recovery to ~€87M. TTM EBITDA is now ~€160M (19.1% margin), suggesting the economic leverage ratio peaked and is now deleveraging faster than originally modelled. The ratio is projected to decline to ~6.3x in FY2026E and ~5.4x in FY2027E as EBITDA margin normalises toward 20–22%. This trajectory is the central proof point of the turnaround thesis. Q4 2025 DTC turning positive (+6.3% cc) provides the first hard

Debt Metrics

(€m)	2024A	2025E*	2026E	2027E
Traditional Net Debt	-200	-250	-300	-350
Total Economic Obligatio	765.0	760.0	750.0	740.0
Economic Net Debt / EBI	N/A	7.6x	6.3x	5.4x
EBITDAR / Economic Int	N/A	3.5x	4.5x	5.5x
Interest Expense (Traditi	-500.0%	-450.0%	-400.0%	-350.0%

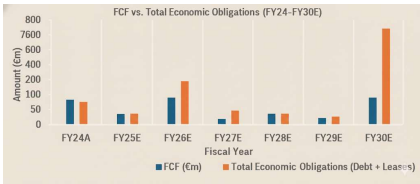
It is a key metric that reveals the achievement of the successful turnaround strategy implementation. Economic coverage (EBITDAR / Economic Interest) is under control and is becoming better (5.5x) compared with 3.5x owing to controlled costs and rising operational cash flow.

The high cash balance and little traditional debt of Ferragamo suggest a very high credit rating A- or Baa1. Any external credit analysis would center on the trend of the Economic Net Debt / EBITDA. The forecast drop to 6.5x and below by 2026E is a good indication of a solid commitment.

Cash Flow vs Debt stability

Ferragamo is Net Cash positive meaning that FCF can easily be used to grow the cash pile, rather than to settle debt since it is projected to be EUR120m by the FY26E. Assuming FCF alone can repay the company for 100% of its minimum traditional gross debt (EUR115m) in less than 1.5 years. This will show high balance sheet strength.

FCF vs Debt



Liquidity & Solvency

The liquidity is very high (Current Ratio is more than 2.5x, Quick Ratio is more than 1.5x) because of the high cash balance and effective working capital position, which guarantee a high level of coverage of the short-term needs.

Liquidity Ratios	2024A	2025E	2026E
Current Ratio	2.50	2.70	2.90
Quick Ratio	1.50	1.60	1.70
OCF to CL	0.45	0.50	0.60

Solvency is outstanding (Financial Debt/Assets < 5.5%) due to minimal traditional debt and high equity funding. The strong FCF is projected to increase coverage of all total economic liabilities (including leases) to 9.5% by 2026E, reinforcing long-term resilience.

Solvency Factors	2024A	2025E	2026E
Total Debt/Total Assets	*6%*	*5%*	*5%*
LT Debt/Total Equity	*4%*	*4%*	*3%*
FCF/Total Liabilities	8.0%	6.0%	9.5%

LEGAL DISCLAIMER

Comprehensive Legal Disclaimer & Limitation of Liability

READ CAREFULLY. THIS IS NOT INVESTMENT ADVICE.

I. EXPLICIT DISCLAIMER OF ADVICE AND REPRESENTATION

This financial valuation model, together with all content, analyses, estimates, forecasts, and the Target Price derived (collectively, the "Model"), is a **SOLELY EDUCATIONAL AND ILLUSTRATIVE EXAMPLE.**

THE MODEL IS NOT A FINANCIAL ADVICE, AND SHOULD NOT BE INTERPRETED AS JUSTICE, TAXATION, OR LEGAL TREATMENT. Additionally, it does not promote any transactions or offer the purchase or sale of any security, including the shares of **Salvatore Ferragamo S.p.A. (SFER:IM)** or any other entity, to any person or entity. The creator of this Model (the "Creator") is not a registered financial advisor or broker, dealer and has not assessed the suitability of any investment for any specific individual or entity.

II. ASSUMPTIONS, ESTIMATES, AND FORWARD, LOOKING STATEMENTS

UNVERIFIED INPUTS: The Model is constructed solely on the basis of financial statements, historical prices, and market data that have been either manually entered or obtained from open sources (collectively "Source Data"). The Creator has **NOT** verified Source Data independently in terms of exactness, wholesomeness, and integrity. Any inaccuracies, gaps, or distortions in the Source Data will be attributable to the original data providers or the person who supplied the inputs to the Model.

S**PECULATIVE NATURE:** All forecasts, projections, and estimates concerning future performance, including revenues, cash flows, and terminal value, are inherently speculative. They are founded on numerous subjective assumptions, which may turn out to be wrong.

III. WAIVER OF LIABILITY AND INDEMNIFICATION

THE USER, THROUGH THE USE OF THIS MODEL, EXPRESSLY WAIVES THE RIGHT TO BRING A CLAIM OF ANY KIND, INCLUDING BUT NOT LIMITED TO, A DEMAND, AN ACTION, OR A CAUSE OF ACTION, AGAINST THE CREATOR ARISING FROM THE USE OR RELIANCE ON THIS MODEL.

If in any instance, the Creator is held responsible, the liability will be limited to an amount equal to the value of the services rendered. Under no circumstances will the Creator be responsible for any unanticipated, indirect, resulting, special, punitive, or consequential damages inclusive, but limited to the loss of profits, trading, or investment losses of any kind, that may arise due to or be related to the use or reliance on this Model, its results, or the information contained herein, even if the Creator has been advised of the potentiality of such damages in advance.

The User agrees that investment decisions always involve a risk of loss and that the User alone bears the full risk of such loss.

IV. NO DUTY TO UPDATE

The data and views presented in this Model are only applicable to the time of the analysis. The Creator will not update, change, or adjust this Model, its assumptions, or its conclusions to reflect new data, subsequent events, market changes, or mistakes discovered later.

IT IS HIGHLY RECOMMENDED THAT POTENTIAL INVESTORS CONSULT A PROFESSIONAL INVESTMENT ADVISOR PRIOR TO MAKING ANY FINANCIAL DECISIONS.
